

To regenerate a You Tube video,

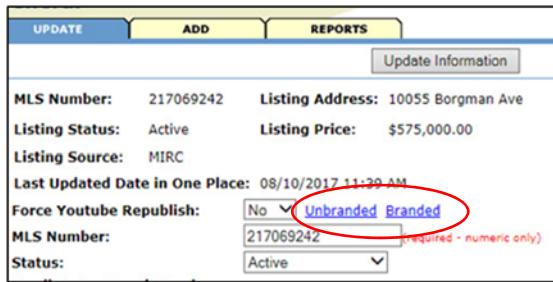

1. Log into **OurOnePlace.net**
2. Choose **my listings**.

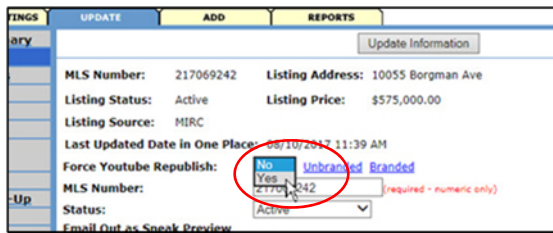

3. Select the **small magnifying glass icon** (located next to the price) on the listing that you would like to regenerate a video for and select **Update Listing** from the drop-down menu.

You can access your videos by selecting the **Unbranded** or **Branded** links listed next to the **Force Youtube Republish** option. If you do not receive an email for one of your videos, this is a good place to go look to see if they have been generated or to access the link if you need it.

4. Select **Yes** from the **Force Youtube Republish** drop-down menu.

Choose **Update Information**.
